

**MOLDEX<sup>®</sup>**  
Ideas that wear well.™

**JAZZ  
BAND<sup>®</sup>**

**6506 HEARING PROTECTOR**

*NRR 22 rating.*

*Extra soft foam pods  
gently cap the ear canal.*

*Hangs easily around  
neck with optional  
breakaway cord.*

*A cooler and lighter  
alternative to earmuffs.*

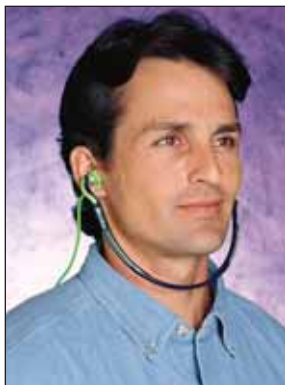

*Does not interfere with  
eyewear.*

*Soft and hard material  
combination dampens  
vibration.*

*Jazzy style increases  
worker acceptance.*

*Includes extra  
pair of pods.*

*Superior comfort and  
increased compliance  
and convenience.*

**THE COMFORTABLE, COST EFFECTIVE  
ALTERNATIVE TO EARMUFFS.**

Jazz Band is cooler to use than earmuffs, and the lightweight design is more comfortable. In fact, with an NRR 22 rating, Jazz Band provides more cost effective protection than many available earmuffs.

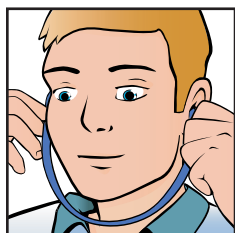

**HANGS LOOSE!**

The handy breakaway neck cord, included with every Jazz Band<sup>®</sup>, allows Jazz Band to hang conveniently around the neck when not in use.

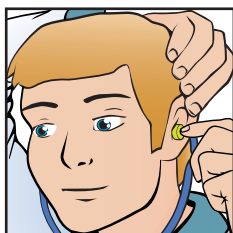

**MOLDEX TECHNICAL ASSISTANCE.**

Moldex provides all of the technical assistance required to set up a hearing protection program. For more information call 800/421-0668 ext. 550 or 310/837-6500 ext. 550.

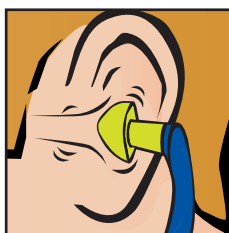

# 6506 HEARING PROTECTOR

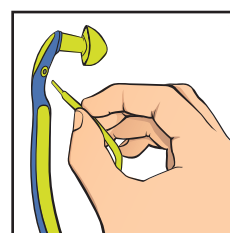

1. Position band under chin with pods in ear canal. Band must be worn so that "MOLDEX" logo faces outwards.

2. With opposite hand lift top of ear and wiggle and push pod gently but firmly into the ear canal until a snug comfortable fit is achieved.

3. Ensure that each pod is adjusted so that they are fully seated in the ear canal.

4. Optional neck cord can be attached by inserting the ends of cord into the neck cord holes on the reverse side of the band. **WARNING: DO NOT TIE OR PERMANENTLY ATTACH THE CORD TO THE BAND.** Use only the provided holes for attaching the neck cord. These holes are designed to release the cord in case the band is accidentally entangled.  
**POD REPLACEMENT**  
For easier replacement of pod moisten band tip.

## MEAN ATTENUATION DATA OF JAZZ BAND®

Frequency (Hz)		125	250	500	1000	2000	3150	4000	6300	8000
Under Chin	Mean Attenuation	27.1	26.8	26.6	26.1	33.1	39.2	38.8	41.8	41.5
	Standard Deviation	4.0	3.9	3.4	3.0	3.7	3.4	3.2	3.9	4.9

Independently tested in accordance with ANSI S.319-1974 by Michael & Assoc., Inc. State College, P.A.  
EPA Noise Reduction Rating 22 decibels.

## ! WARNING

Use this laboratory-derived attenuation data for comparison purposes only. The amount of protection afforded in field use often is significantly lower depending on how the protectors are fitted and worn.

Failure to follow all instructions could result in hearing loss or injury. Failure to obtain a proper fit will reduce effectiveness of hearing protectors and could result in hearing loss or injury.

The Jazz Band must only be used as part of a hearing conservation program that complies with applicable local safety and health regulations.

The amount of protection will be reduced if band becomes damaged, cracked, distorted, or loses tension; or pods become worn, torn or misshapen. Replace with a new Jazz Band or pods as appropriate.

Overprotection can be dangerous. The wearer must be able to hear warning signals.

Wearers with hearing loss should exercise extreme caution.

It is the employer's responsibility to ensure that the type of hearing protector and its NRR is appropriate for the user in their particular workplace.

Failure to follow these warnings could result in serious injury or death.
